of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler-its products, people, and performance over time-with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of

the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate.

Although the Assyrian kingdom that dominated the Ancient Near East between the ninth and seventh centuries BC had a rich material culture, attested particularly by the distinctive stone wall reliefs and colossal gateway figures, practically nothing is known about Assyrian metalwork. There has been no previous survey of this subject,

largely because most of the material was not accessible. This volume makes available for the first time a vast amount of previously unpublished metalwork, much of it from the Assyrian capital city of Nimrud, excavated first by Sir Henry Layard between 1845 and 1851 and then by the British School of Archaeology in Iraq between 1949 and 1963. It emerges that Assyria had a thriving metalworking industry probably superior to any contemporary state in the region, and was producing large quantities of sophisticated bronze and ironwork, of high technical quality and sometimes elaborately decorated. This book will therefore be of interest to archaeologists, art historians and
