Stock Pattern

Recognition

Algorithm

Online Library A Stock Pattern

Recognition
Algorithm
Based On
Neural
Networks

Currently, there are mainly two kinds of stock price pattern recognition algorithms: the algorithm based on rule-matching and the algorithm based on template-matching.

However, both of the two

Online Library A Stock Pattern

algorithms
highly require
the
participation of
domain experts,
as well as their
lacks of the
learning
ability. To
solve these
problems, the
paper proposes a
stock price
pattern

Online Library A

Stock Pattern

Recognition

approach based

upon the

artificial

neural network.

Based On
A Stock Pattern

Recognition

Algorithm Based

On Neural

Networks

recognize a
pattern that
could vary in
size and length.

To use this

Online Library A Stock Pattern

algorithm, we must use reference time series, which have to be selected by a human. The references must generalize well when compared with signals similar to the pattern in order to capture the

Online Library A Stock Pattern

whole range. The
solution we
propose to study
is based on Deep
Learning.

Algorithmic ...*

Online Library A Stock Pattern

The fuzzy
algorithms are
quite complex in
nature yet
produce the best
pattern
recognition
results. This is
because the
modeling is for
uncertain
domains and
components for
recognition.

Online Library A Stock Pattern

This can be
understood as a
part of the
probabilistic
approach.
