I have a Monstertronic truggy with a "BDESC-S10E-RTR" speed controller. Since my last drive, it won't run anymore: when I connect a freshly charged battery (2S LiPo, the only one I use, and it's fairly new), the ESC blinks red, about once per second - notably before I turn the receiver on.. When I turn on the transmitter and the receiver, the ESC stops blinking.

ESC is blinking red - help requested : rccars
