It enumerates the various aspects of food and beverage department such as understanding of the industry, organisation of the department, menu served, various service procedures, managing cordial relations with customers, environmental concerns etc.
--

Excerpts from the book: "It may be well for us to take a general view of the subject of Yoga. What is the end and aim of the teachings and the practices? What does it all mean? What is Man seeking for in all these endeavors? What does life, and growth, and development, and evolution mean? These are questions that thinking people are constantly asking, and which but few are able to answer even partially. The Yogi Philosophy teaches that the end of all human endeavor and life is to allow the soul to unfold until it reach with Spirit. And as Spirit is the divine part of man- the bit of God-material in him - this union eventually will result in what is known as Union with God - that is the bringing of the individual soul into conscious touch and union with the centre of all life."

The Expressiveness of the Body meditates on the contrasts between the human body described in classical Greek medicine and the body as envisaged by physicians in ancient China.

Shows how the family response to mental illness is structured by factors external to the illness.

Handbook of Clinical Neurology: Neuro-Oncology, Part II provides an overview of the most recent developments in the field of neuro-oncology, including new diagnostic imaging techniques, along with immunology, molecular biology, and clinical aspects of different types of tumors. It also considers management and new therapeutic strategies for tumors, such as gene therapy, radiation therapy, and molecularly targeted treatments. Divided into five sections encompassing 33 chapters, the book begins with a description of specific tumor types such as low-grade gliomas, anaplastic astrocytomas, and medulloblastoma and primitive neuroectodermal tumors, along with rare brain tumors like neurofibromatosis and other genetic syndromes. It then discusses tumors at special sites, from brainstem tumors to peripheral nerve tumors, tumors of the meninges, and optic, hypothalamic, and thalamic tumors. It also explains the neurological complications of systemic cancer and the adverse effects of some treatments. Clinicians and neuroscientists, as well as researchers who read this book, will gain a better understanding of the clinical features and management of the neurological manifestations of tumors. Unique perspectives on advancements in the diagnosis and treatment of tumors of the nervous system An in-depth exploration of new strategies, including diagnostics, and gene and molecularly targeted therapies A state-of-the-art reference that summarizes the clinical features and management of the many neurological manifestations of tumors of the nervous system

Neoliberal education policies have privatised, marketised, decentralized, controlled and surveilled, managed according to the business and control principles of new public managerialism, attacked the rights and conditions of education workers, and resulted in a loss of democracy, critique and equality of access and outcome. This book, written by an impressive international array of scholars and activists, explores the mechanisms and ideologies behind neoliberal education, while evaluating and promoting resistance on a local, national and global level. Chapters examine the activities and impacts of the arguably socialist revolution in Venezuela, the Porto Alegre democratic community experimental model in Brazil, the activities of the Rouge Forum of democratic socialist teachers and educators in the USA, Public Service International, resistance movements against the GATS (General Agreement on Trade in Services), and trade union and social movement and community/parental opposition to neoliberal education policies in Britain and in Latin America.

Re-Dressing the Canon examines the relationship between gender and performance in a series of essays which combine the critique of specific live performances with an astute theoretical analysis. Alisa Solomon discusses both canonical texts and contemporary productions in a lively jargon-free style. Among the dramatic texts considered are those of Aristophanes, Ibsen, Yiddish theatre, Mabou Mines, Deborah Warner, Shakespeare, Brecht, Split Britches, Ridiculous Theatre, and Tony Kushner. Bringing to bear theories of 'gender performativity' upon theatrical events, the author explores: " the 'double disguise' of cross-dressed boy-actresses " how gender relates to genre (particularly in Ibsens' realism) " how canonical theatre represented gender in ways which maintain traditional images of masculinity and femininity.

Samuel Beckett is unique in literature. Born and educated in Ireland, he lived most of his life in Paris. His literary output was rendered in either English or French, and he often translated one to the other, but there is disagreement about the contents of his bilingual corpus. A Beckett Canon by renowned theater scholar Ruby Cohn offers an invaluable guide to the entire corpus, commenting on Beckett's work in its original language. Beginning in 1929 with Beckett's earliest work, the book examines the variety of genres in which he worked: poems, short stories, novels, plays, radio pieces, teleplays, reviews, and criticism. Cohn grapples with the difficulties in Beckett's work, including the opaque erudition of the early English verse and fiction, and the searching depths and syntactical ellipsis of the late works. Specialist and nonspecialist readers will find A Beckett Canon valuable for its remarkable inclusiveness. Cohn has examined the holdings of all of the major Beckett depositories, and is thus able to highlight neglected manuscripts and correct occasional errors in their listings. Intended as a resource to accompany the reading of Beckett's writing—in English or French, published or unpublished, in part or as a whole—the book offers context, information, and interpretation of the work of one of the last century's most important writers. Ruby Cohn is Professor Emerita of Comparative Drama, University of California, Davis. She is author or editor of many books, including Anglo-American Interplay in Recent Drama; Retreats from Realism in Recent English Drama; From Desire to Godot; and Just Play: Beckett's Theater.

From basic concepts to research grade material, Mobile Web 2.0: Developing and Delivering Services to Mobile Devices provides complete and up-to-date coverage of the range of technical topics related to Mobile Web 2.0. It brings together the work of 51 pioneering experts from around the world who identify the major challenges in Mobile Web 2.0 applications and provide authoritative insight into many of their own innovations and advances in the field. To help you address contemporary challenges, the text details a conceptual framework that provides modeling facilities for context-aware, multi-channel Web applications. It compares various platforms for developing mobile services—from the developer and user perspectives—and explains how to use high-level modeling constructs to drive the application development process through automatic code generation. Proposes an expanded model of mobile application context Explores mobile social software as an Information and Communications Technology (ICT) Discusses the effect of context on mobile usability Through empirical study, the book tests a number of hypotheses on the use of software implementation technology and location context in mobile applications. It introduces Reusable End-User Customization (REUC)—a technique that allows users to adapt the layout of Web pages and automatically reapplies those preferences on subsequent visits. It also investigates the need for non-visual feedback with long system response times, particularly when downloading Web pages to mobile devices.

Small social groups are fundamental for achieving personal growth, social development, socialization, and the skills of sustaining relevance, relationships, and connections to society. Unfortunately, those who would benefit most from small groups often find themselves unable to achieve membership. Lacking the necessary skills for entry, these individuals may never enjoy the advantages of group membership. Advancing a practice methodology that specifically targets the socially unskilled, Norma C. Lang provides much-needed guidance to practitioners helping individuals become part of group life. Grounded in extensive practice, Lang's methodology addresses the special needs and anomalous functioning of individuals who lack the skills to form and use groups. She outlines the unique pregroup processes of socially unskilled populations and provides a methodology for advancing social competence. She also identifies the professional and agency requirements for working with presocial processes. Widely applicable to practice with social work groups, Lang's method greatly expands the literature on social work theory and practice with individuals and groups.
