The East North Central states form one of the nine geographic subdivisions within the United States which are officially recognized by the United States Census Bureau. These states are near the Great Lakes. The division contains five states: Illinois, Indiana, Michigan, Ohio and Wisconsin. It is one of two divisions used to categorize the region of the U.S. generally called the "Midwest"; the other such division is the West North Central states. The region closely matches the area of the Northwe

During summer, the central and eastern United States often is blanketed by a murky veil of haze that may last for days. The haze shrouds the sky and dims the sun --- sometimes making it altogether disappear before the end of the day (Figure 1). To some, haze is so commonplace that it is assumed to be natural and is accepted as a fact of life.

### Haze over the Central and Eastern United States

In 2011 in eastern united states there are 26 states and had a population around 179,948,346 which is around 58.28% of the total population of the united states.
