Geological time has been divided into four eons: Hadean, Archean, Proterozoic, and Phanerozoic, and as shown in Figure 8.3, the first three of these represent almost 90% of Earth ' s history. The last one, the Phanerozoic (meaning “ visible life ”), is the time that we are most familiar with because Phanerozoic rocks are the most common on Earth, and they contain evidence of the life forms that we are all somewhat familiar with.

Geology - Chapter 8: Geologic Time / Geologic Maps. The average human lifespan is less than 80 years. Because of this, we tend to think that 80 years is a very long time. In reality, it is merely a fleeting moment. 2 Peter 3:8 says that a thousand years to God is like a day. That is because as an eternal being, time has no meaning.
