MANUAL OF STANDARD TRAFFIC SIGNS AND ... - trid.trb.org
This Traffic Signs Manual provides the technical guidance needed to ensure that the new signs are designed and placed in a standard way. All road authorities must use the new signs, and all road users must act on the instructions and information they give.

BANGLADESH ROAD SIGN MANUAL
The MnDOT manual includes sign and marking designs for Minnesota specific signs as well as designs not found in the FHWA book. It also includes punching codes for signs mounted on MnDOT sign structures. MnDOT 2020 manual is based off of the two FHWA's Standard Highway Signs and Markings book; 2004 Edition and the 2012 Supplement to the 2014 Edition. The 2012 Supplement has standard signs not included in the 2004 Edition and also has some updated sign designs.

This edition of the British Columbia Manual of Standard Traffic Signs & Pavement Markings replaces the Interim Revised Edition date 1988, originally published in 1968 and the Pavement Marking Manual published in 1994. This manual is in general conformance with the Manual of Uniform Traffic Control Devices for Canada. It also conforms with Division 23 of the Regulations pursuant to the Motor Vehicle Act which specifies the designs for a number of the signs contained within this manual. Section A of this manual provides standards for design and use of traffic signs, but is not intended to override good engineering judgement; nor are the recommended standards intended to be a legal requirement. The authority for the placement of traffic signs and other traffic control devices on all streets and highways in British Columbia is contained in various Provincial acts and municipal by-laws.

Detailed drawings of the Standard Highway Signs prescribed or provided for in the Manual on Uniform Traffic Control Devices (MUTCD), 2003 Edition, have been prepared by the Office of Transportation Operations, Federal Highway Administration, U. S. Department of Transportation, for use by all traffic authorities, agencies, jurisdictions and persons involved with the fabrication, installation and maintenance of traffic signs on streets and highways in the United States. These drawings are presented in English units as an alternate to metric dimensional designs. They are provided to promote uniformity in design throughout the United States in accordance with Title 23, U.S. Code, Sections 109(b), 109(d) and 402 (a), and Highway Safety Program Standard 13, (Traffic Engineering Services). As stated in the MUTCD, (Uniformity in design includes shape, color, dimensions, legends and retroreflection. This manual shows typical signs approved for use on streets and highways. Detailed drawings of these and other approved signs are available to State and local highway and traffic authorities and similarly interested agencies. All symbols shall be unmistakably similar to those shown and where a word message is applicable, the wording shall be as herein provided unless alternative wording is optional. Most standard symbols are oriented facing left; however, this does not preclude the use of mirror images of these symbols where the reverse orientation might better convey a direction of movement to vehicle operators. Standardization of these designs does not preclude further improvements by minor changes in the proportion of the symbols, width of borders, or layout of word messages, but all shapes and colors shall be as indicated.

This edition of the British Columbia Manual of Standard Traffic Signs & Pavement Markings replaces the Interim Revised Edition date 1988, originally published in 1968 and the Pavement Marking Manual published in 1994. This manual is in general conformance with the Manual of Uniform Traffic Control Devices for Canada. It also conforms with Division 23 of the Regulations pursuant to the Motor Vehicle Act which specifies the designs for a number of the signs contained within this manual. Section A of this manual provides standards for design and use of traffic signs, but is not intended to override good engineering judgement; nor are the recommended standards intended to be a legal requirement. The authority for the placement of traffic signs and other traffic control devices on all streets and highways in British Columbia is contained in various Provincial acts and municipal by-laws.

The Book 7 Temporary Conditions Field Edition has been developed to show how to apply traffic control devices in temporary construction, maintenance, and utility work zones, to help ensure worker safety, motorist safety, and motorist mobility. It has been prepared to assist workers in the field by illustrating the appropriate signing and the channelization required for the most common types of roadway work operations.
