~~Mind/Body Health: The Effects of Attitudes, Emotions, and ...~~

Stress directly affects the heart. Stress hormones, especially cortisol, increase the levels of blood sugar, cholesterol, and a special kind of fat that increases the risk of heart disease. Also, preexisting heart conditions are especially exacerbated by stress, which could lead to high blood pressure and, in some cases, heart attacks.

Different perspectives on mental health and mental illness. There are various approaches to mental health and mental illness around the world. Most health professionals in the UK agree on a similar set of clinical diagnoses and treatments for mental health problems. We have chosen to reflect this approach in our information, as these are the terms and treatment models that you are most likely ...

~~About mental health problems | Mind, the mental health ...~~

How you think can affect how you feel. And how you feel can affect your thinking. There is an extraordinarily intimate two-way communication going on between our body and mind that affects both our physical state and our mental and emotional health. An example of this mind-body connection is how your body responds to stress.

~~How your Mind Affects your Body — Terraskills~~

Health Anxiety and the Mind-Body Connection. Health anxiety can have an enormous impact on physical and emotional health. Interestingly, research into the overlap of the mind and body connection shows that the mind, through beliefs, emotions, and perceptions, can manifest as physical symptoms in the body.

~~Health Anxiety: The Interplay Between the Mind and Body~~

Self-consciousness will tighten your buttock muscles (so you are literally sitting on your tension), you will sweat more than usual, may feel slightly nauseous, and you'll probably fluff your words, just when you want to appear suave and confident. In other words, our emotions affect us physically.

~~How Your Mind Affects Your Body | HuffPost Life~~

Common mental health effects of trauma These are some common effects of trauma that you might recognise: Flashbacks – reliving aspects of a traumatic event or feeling as if it is happening now, which can happen whether or not you remember specific details of it. To find out more, see our information on flashbacks.

~~Effects of trauma | Mind, the mental health charity — help ...~~

By analogy with the health of the body, one can speak metaphorically of a state of health of the mind, or mental health. Merriam-Webster defines mental health as "a state of emotional and psychological well-

being in which an individual is able to use his or her cognitive and emotional capabilities, function in society, and meet the ordinary demands of everyday life".

### ~~Mind — Wikipedia~~

Healing Body and Mind Ideas for mind-body wellness. Relaxing your mind and body can help ease stress. It can also relieve anxiety, depression, and sleep problems. Try one or more of the following techniques to help you relax: Deep breathing is one of the best ways to lower stress. When you breathe deeply, it sends a message to your brain to calm down and relax.
