This seventh edition includes new chapters and maintains popular features from previous editions such as self awareness prompts while adding research boxes and student worksheets at the end of each chapter.

The AJN Book of the Year award-winning textbook, Psychiatric Nursing: Contemporary Practice, is now in its thoroughly revised, updated Fourth Edition. Based on the biopsychosocial model of psychiatric nursing, this text provides thorough coverage of mental health promotion, assessment, and interventions in adults, families, children, adolescents, and older adults. Features include psychoeducation checklists, therapeutic dialogues, NCLEX® notes, vignettes of famous people with mental disorders, and illustrations showing the interrelationship of the biologic, psychological, and social domains of mental health and illness. This edition reintroduces the important chapter on sleep disorders and includes a new chapter on forensic psychiatry. A bound-in CD-ROM and companion Website offer numerous student and instructor resources, including Clinical Simulations and questions about movies involving mental disorders.

Thoroughly updated for its Second Edition, this comprehensive reference provides clear, practical guidelines on documenting patient care in all nursing practice settings, the leading clinical

specialties, and current documentation systems. This edition features greatly expanded coverage of computerized charting and electronic medical records (EMRs), complete guidelines for documenting JCAHO safety goals, and new information on charting pain management. Hundreds of filled-in sample forms show specific content and wording. Icons highlight tips and timesavers, critical case law and legal safeguards, and advice for special situations. Appendices include NANDA taxonomy, JCAHO documentation standards, and documenting outcomes and interventions for key nursing diagnoses.

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

"The 2nd edition of "Psychiatric and Mental Health Nursing" continues to takes its popular holistic approach, helping students and beginning practitioners understand the complex causation of mental illness, its diagnosis, effective interventions and treatments, and the client's experience of mental illness. Written by an experienced team of contributors from Australia and New Zealand, the client and student centred approaches have been enhanced in this edition to focus even more closely on providing students with practical examples and guidance on helpful and transformative communication. New content has also been included on indigenous mental health, mental health education and health promotion."--Provided by publisher.

Designated a Doody's Core Title! Supporting the urgent need for new patient safety guidelines and practices, Focus on Patient Safety, provides the most current and authoritative research and review to help decision makers develop new and much-needed standards and

practices in nursing. With contributions from experts in the field, this new up-to-date reference focuses on key disciplines and topics that are critical to patient safety today including: Patient safety indicators Medication errors Falls and injury prevention Hospital-acquired infections Patient safety in acute-care units in hospitals Medications in the perioperative environment Home visit programs for the elderly Nursing homes Informatics issues Organizational, climate, and culture factors From new and emerging issues in patient safety to a review of research methods and measurement, this new 24th volume in the Annual Review of Nursing Research (ARNR) series continues to provide the highest standards of content and authoritative review of research for students, researchers, and clinicians.

Combining psychiatric theory with a holistic approach, this text aims to enable students in psychiatric nursing to care for patients' physical, psychological, social and spiritual needs. It covers areas such as spiritual and religious issues, care of AIDS patients, adult development issues, losses, homelessness, loneliness and violence. The authors consider the total person, bringing together the latest biological advances, proven psychodynamic approaches, and spiritual and cultural interventions to help readers understand the many aspects of psychiatric nursing today. There are case studies, a chapter on mind-body-spirit therapy, and an integration of DSM-IV categories throughout.

Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses. Thoroughly revised and updated to reflect current research and the UK guidelines as well as the changing attitudes about mental health, mental health services and mental health nursing in UK. Set within a recovery and patient framework, this text provides vital information for approaching the
