Manuscripts containing Sanskrit texts, the present study investigates a fundamental and so far rarely studied aspect of manuscript production: visual organisation. Scribes adopted a variety of visual strategies to distinguish one text from another and to differentiate the various sections within a single text (chapters, sub-chapters, etc.). Their repertoire includes the use of space(s) on the folio, the adoption of different writing styles, the inclusion of symbols of various kind, the application of colours (' rubrication '), or a combination of all these. This study includes a description of these various strategies and an analysis of their different implementations across the selected geographical areas. It sheds light on how manuscripts were produced, as well
