SCons is a build system. It takes a bunch of input files and run tools on them to produce output. SCons is written in pure Python, works the same way on Linux, Windows and OS X, and may be run without installation. SCons' SConstruct files are Python scripts with built-in commands that create a build tree.

For 3.3, and 3.4 and only those versions, we need other Python versions as a compile time dependency. Nuitka itself is fully compatible with all mentioned versions, Scons as an internally used tool is not. For these versions, you need a Python2 or Python 3.5 or higher installed as well, but only during the compile time only. That is for use with Scons (which orchestrates the C compilation ...
