Screening and Treatment of Subclinical Hypothyroidism or ...

Screening and treatment of subclinical hypothyroidism or hyperthyroidism: Ruge B, Balslem H, Sehgal R, Relevo R, Gorman P, Helfand M Record Status. This is a bibliographic record of a published health technology assessment from a member of INAHTA. No evaluation of the quality of this assessment has been made for the HTA database.

Screening and treatment of subclinical hypothyroidism or ...

Screening for both subclinical hypo- and hyperthyroidism is accomplished through serum TSH, with testing of serum free T4 and free T3 if the TSH falls outside of the normal range. 1 Additional testing is predicated on the results of this testing for diagnostic purposes and exclusion of other conditions.

Effectiveness of Screening and Treatment of Subclinical ...

Currently there are no studies that evaluate the benefits and harms of screening for subclinical thyroid dysfunction in the primary care setting. Studies of treatment tend to be small and of short duration, and they have failed to demonstrate improvement in quality of life, blood pressure, and weight.

Screening and Treatment of Subclinical Hypothyroidism or ...

screening or treating subclinical thyroid dysfunction to be beneficial. Since 2002, no studies have directly assessed the benefits or harms of screening. Six good-to fair-quality studies found that treating subclinical hypothyroidism did not improve quality of life, blood pressure, or body mass index (BMI). The

Screening and Treatment of Subclinical Hypothyroidism or ...

To date, evidence-based reviews have recommended against routine screening and treatment of subclinical thyroid dysfunction, primarily based on the lack of evidence that treating subclinical thyroid dysfunction improves patient-centered outcomes.

Screening and Treatment of Subclinical Hypothyroidism or ...

Some studies suggest that treatment of subclinical hyperthyroidism with antithyroid medication 18 or radioactive iodine 19 may improve symptoms, heart rate, and cardiovascular parameters. However,...

Subclinical Hyperthyroidism: When to Consider Treatment ...

Screening with TSH might be increasing, with 57% of 55-year-old women screened in one study. 12 However, screening thyroid tests resulted in less than 0.5% being treated for overt hypothyroidism. 13 The reason for screening asymptomatic patients with low-value tests like TSH is complicated but involves multiple factors including patient requests, physician practice patterns, and beliefs around ...

Subclinical hypothyroidism and TSH screening | The College ...

There are no RCTs of screening for thyroid function (ordering thyroid-stimulating hormone [TSH] testing in nonpregnant, healthy people). Despite approximately 20 RCTs, no patient-oriented benefits (like preventing cardiovascular disease or reduced fatigue or weight) have been identified from treating subclinical hypothyroidism.

Subclinical hypothyroidism and TSH screening

However, widespread screening and treatment of subclinical thyroid dysfunction can also result in harms due to labeling, false-positive results, and overdiagnosis and overtreatment. The USPSTF...

Screening and treatment for subclinical thyroid disease. Screening and treatment for subclinical thyroid disease JAMA. 2004 Apr 7;291(13):1562; author reply 1562-3. doi: 10.1001/jama.291.13.1562-a. Authors Bernadette Biondi, Gaetano Lombardi, Emiliano A Palmieri. PMID: 15069039 ...

Screening and treatment for subclinical thyroid disease

The USPSTF found 14 randomized trials of treatment using levothyroxine (LT4) therapy, 2 but few were relevant to the issue of treating screen-detected subclinical hypothyroidism in primary care clinical settings, and most of the potentially relevant studies suffered from significant design flaws. Most studies were in groups of patients known to have thyroid disease (e.g., patients with ...
