"The official style guide used by the writers and editors of the world's most authoritative news organization."

Written in her wonderfully honest, edgy, passionate and often hilarious voice, Tiffanie DeBartolo tells the story of Eliza Caelum, a young music journalist, and Paul Hudson, a talented songwriter and lead singer of the band Bananafish. Eliza's reverence for rock is equaled only by Paul's, and the two fall wildly in love. When Bananafish is signed by a big corporate label, and Paul is on his way to becoming a major rock star, Eliza must make a heartbreaking decision that leads to Paul's sudden disappearance and a surprise knock-your-socks-off ending. Praise for Tiffanie DeBartolo's God-Shaped Hole "From highs to heartbreak, DeBartolo conjures an affair to remember."—"People "Honest, raw, and engaging."—"Booklist "This generation's Love Story."—Kirkus Reviews God-Shaped Hole was a Book Sense Top 10 Paperback Selection.

Presents fantasy stories written by Internet authors that explore how people, cultures, and societies are affected by the predictions of the Machine, an object that provides short yet vague phrases about how a person will die.

This book offers 32 texts and case studies from across a wide range of business sectors around a managerial framework for Sustainable Business. The case studies are developed for and tested in executive education programmes at leading business schools. The book is based on the premise that the key for managing the sustainable business is finding the right balance over time between managing competitiveness and profitability AND managing the context of the business with its political, social and ecological risks and opportunities. In that way, a sustainable business is highly responsive to the demands and challenges from both markets and societies and managers embrace the complexity, ambivalence and uncertainty that goes along with this approach. The book presents a framework that facilitates the adoption of best business practice. This framework leads executives through a systematic approach of strategic analysis and business planning in risk management, issues management, stakeholder management, sustainable business development and strategic differentiation, business model innovation and developing dynamic capabilities. The approach helps broaden the understanding of what sustainable performance means, by protecting business value against sustainability risks and creating business value from sustainability opportunities.
