This volume of collected essays deals with medicine in the university world of thirteenth to sixteenth century Italy, discussing both the internal academic milieu of teaching and learning and its relation to the surrounding culture of medieval and Renaissance Italian cities.

A three volume index by personality, institution and subject to the critical bibliographies on the history of science published in ISIS from 1913 to 1965. References in the bibliographies are to items in books, journals, reports, documents, etc. An excellent starting point for researching a topic in the history of science.

This book explores how, in the late eleventh century, an Arabic medical compendium was adapted for a Latin-reading audience by Constantine the African and his South Italian colleagues, thus revolutionizing the standard and sophistication of Western medicine.

This large reference work to manuscripts is the result of painstaking investigation into historical sources dating from the first seventy years of Norman rule. Gameson has identified approximately 900 manuscripts and has produced a detailed catalogue of authors, documents and their provenance. An essential reference tool to scholars of the period.
